PROFIL

I'm Benjamin, once a pro at band-aids and ambulances, now a maestro of tech and learning. Think of me as the nurse who plugged into the Matrix and found a way to make education as exciting as a heart-pounding rescue. With my unique blend of medical expertise and tech wizardry, I'm here to bridge the gap between healthcare and innovation, bringing about a revolution and inspire minds.

EDUCATION

2020 - 2023	Master of Medical Simulation @ MedUniGraz simulation education in nursing

REFERENCES

In recent years, I have engaged in a wide range of projects, spanning from hands-on training experiences in virtual reality to intricate multi-user training sessions in mixed reality. As a healthcare professional, I consistently strive to leverage my expertise as a nurse, along with my roles as a trainer, educator, and simulation specialist. Throughout my work, my primary emphasis is on tailoring the user experience for individuals, developing learning objectives, and establishing effective feedback mechanisms.
